

I pay for this service to receive all the channels that are provided to me. The traffic and weather stations are most important because I can't always find local traffic and weather on my FM stations. It is easier for me to use the XM satellite stations that give me up to the minute weather and traffic information. If I am paying for this, I feel I should get every channel that XM wants to offer. If you take these channels away, it would make XM almost useless. I use these stations quite frequently. Do not remove them.
